

ENCO's economical **UN/DOT approved** WasteSack™ cubic yard bag is a user-friendly container manufactured to strict standards for hazardous waste disposal.

Manufactured from heavy-duty polypropylene and UV coated for rugged outdoor conditions, the WasteSack features one-piece construction and a convenient duffel top. Rated for 2,200lb (997kg) capacity, it is ideal for hazardous and non-hazardous waste streams such as contaminated soil, plating sludge, asbestos and lead based materials, and contaminated personal protection equipment (PPE).

The WasteSack's economical design not only stores and ships flat, but can replace the capacity of four 55
