

The TransPack is a soft-sided packaging product for hazardous and non-hazardous bulk waste disposal. Designed to be self-standing, it can be used with or without loading frames.

Meeting the 49 CFR 171.8 standard for "sift-proof packaging", the TransPack has a 5,000lb to 20,000lb capacity and is available from 2.5 to 10 cubic yards (1.9 to 7.6 cubic meters).

The TransPack is ideal for surgical remediation efforts and its sift-proof certifications allows for the disposal of numerous hazardous waste streams,
